

Summary

- Resultsdriven Technical Program Manager with 17+ years of experience leading crossfunctional teams, driving complex technical initiatives, and delivering highimpact programs on time and within scope. Expertise in Agile and Waterfall methodologies, stakeholder management, and risk mitigation. Adept at bridging the gap between engineering, product, and business teams to align technical execution with strategic objectives. Strong background in software development, cloud technologies, and scalable infrastructure. Proven ability to manage multiple programs simultaneously, optimize processes, and improve operational efficiency. Passionate about fostering collaboration, driving innovation, and delivering customercentric solutions.

Technical Skills

- JAVA, Spring Boot, Angular, React JS, ASP.Net, C#.Net, Microservices, SQL Server, Snowflake, MY SQL, Azure (IAAS, PAAS, SAAS), AWS, Blob Storage, Information Security, Networking, Microservices, Infrastructure, Virtualization, Automation, Azure DevOps, CI/CD, Cloud Security, TFS/ VSTS, Shell, HA & DR, ARM, Elastic, Search, Artificial Intelligence, Machine Learning, Azure Data Factory, ETL, SSRS/SSIS, GitHub, Kubernetes, Automation

Non Technical Skills

- Strategic Planning, Cross Functional Team Leadership, Program Management, Conflict Resolution, Risk Management, Governance & Compliance, Budgeting, Stakeholder Engagement, Quality Assurance, Program and Project management, Scrum Master, Project Documentation, Product Backlog, Product Road Maps, People Management, Project Tracking, Agile, ITIL process, JIRA, Azure DevOps, RFP & RFI

Education

UP-TECH University

MCA -

Certifications

- Prince 2 Practitioner
- Certified Scrum Master (CSM)
- Microsoft Certified Technology Specialist (SQL DB)

Work Experience

Technical Program Manager

Sasken Technologies -

Job Description:

Projects Undertaken: Robo Taxi prototype, Connected Car Solutions initiative for EV predictive battery maintenance on AI/Gen AI

Technologies Used: Agile, Typescript, Playwright, AI, Gen AI

Achievements and Contributions: Liaised with the C-Suit leadership team and Clients for business proposals and presentations., Mentored project managers on project management methodologies and implemented new agile project management methodologies end to end that increased project delivery efficiency by 25%, reducing time-to-market for new product features., Working on a futuristic Robo Taxi prototype which will create a benchmark in terms of commercial transportation., A problem solver with the intention to research the best practice and best possible solution for the Customer satisfaction., Have collaborated with diverse teams, diverse culture and teams in different geo locations., Demonstrated organizational capabilities helping resolve customer business objectives and needs, saving cost, effort and time., Commercial evaluation through the pre-sales team to align with the P&L margins., Involved in RFPs for different initiatives and solutioning., Implemented Cursor AI for productivity and reliability in the code generation on Typescript and Playwright for the development team., Worked on Connected Car Solutions initiative for EV predictive battery maintenance on AI/Gen AI., People Manager for 40+ engineers and architects and responsible for ensuring excellent CSAT scores for all the projects through continuous improvement., Partnered with vendors for delivering multiple projects for various customers

Technical Program Manager

-

Job Description: Consulting

Projects Undertaken: Azure Data Factory (ADF), Cyber Security Project (IAM / PAM / WAF / Compliance / Encryption), Agile Framework for an ecommerce project

Technologies Used: Azure, Agile, Angular, Node.JS, IOS, Android, Generative AI

Achievements and Contributions: Provided technical and management oversight to multiple programs, Worked on Azure Data Factory (ADF) project along with Cyber Security Project (IAM / PAM / WAF / Compliance / Encryption), Consulting on Agile Framework for an ecommerce project (Angular / Node.JS / IOS and Android), Worked closely with the development team on Generative AI adoption initiatives, Lead and coordinated cross-functional teams to deliver new features, services, products and systems., Developed comprehensive project plans, including schedules, resource allocation, and status reports., Collected and documented business requirements, functional and design specifications., Assembled and managed project teams, setting clear milestones and schedules for successful delivery., Implemented and oversee engineering KPIs, benchmarks, and processes with appropriate governance., Managed risks, tracking progress, and addressing project bottlenecks and trade-offs while balancing business and technical needs., Collaborated with stakeholders in product management, professional services, and support to define requirements and contribute to the product roadmap., Communicated project outcomes, successes, failures, and lessons learned to stakeholders., Developed business cases for project approval and stakeholder buy-in., Lead cost-saving and continuous improvement initiatives., Ensured cross-functional team readiness for project milestones., Managed technical project delivery in a dynamic, deadline-oriented environment., Resolved inter-team dependencies and conflicts.

Technical Project Manager

Nalashaa Solutions Pvt. Ltd -

Job Description:

Projects Undertaken: Support Project (Event One, Certent and Mekkographics Application), Legacy Application migration of projects to Azure cloud

Technologies Used: Azure DevOps, Agile, JIRA, Confluence, Azure Cloud

Achievements and Contributions: Delivered multiple support projects with new enhancements to Client (Dell) on a very stringent timeline, Managed multiple projects and teams in the portfolio, Managed legacy Application migration of projects

to Azure cloud, Created Epic, User stories, Tasks, Predecessor and Successors on Azure DevOps with acceptance criteria for the product, Oversee all the Agile ceremonies with the team to cater business needs and improvements, Preparing Project plan, Release plans, Incident management, Estimations on the requirements for Releases, Managed stakeholders, resourcing, schedule, cost, delivery, quality and risks, Backlog refinement and feature prioritization for upcoming sprint readiness, User story and Acceptance criteria defining for the team, Updating project document on Confluence for internal and external team collaboration, Creating JIRA Dashboard with updated attributes, Accountable for PI planning, execution and tracking of the project with an update to stakeholders every week, Contributed to process improvements and with pre-sales team for lead generation and analysis for business growth

Technical Program Manager

HCL Technologies -

Job Description:

Projects Undertaken: IOT / Infra Development / Automation / Legacy to Cloud migration and Digital Transformation, Legacy telemetry data migration from Azure to AWS, Automated VM Provisioning Project through MS SCORCH

Technologies Used: JAVA, Azure, AWS, MS SCORCH, Planview, Scrum

Achievements and Contributions: The Program Portfolio involved multi-level stakeholder management and coordination with cross functional teams for achieving the business objective, Coordinated with multiple project managers for high level visibility and traceability for the success of the Program, Accomplished a massive legacy telemetry data migration from Azure to AWS through JAVA development for Data & Analytics purpose, Delivered automated VM Provisioning Project through MS SCORCH to optimize the provisioning and approval process, Planned and managed multiple projects and teams in the program., Provided leadership and overall strategy direction both short term and long term for the software development and delivery, Product Architecture, Design and Releases, in lieu of rapidly changing, highly competitive marketplace, Collaborated with other global teams, located across multiple geographies, for integrated solution offerings, Supported and Empowered team members, Scrum Development Team, and Enterprise Architecture in developing best practices for solution delivery, Collaborated with the leadership teams to formulate short / long-term business objectives and create well-defined program and product road maps, Prioritized delivery based on Program roadmap by ensuring maximization of business value, Driven product enhancement efforts end to end like providing feasible, scalable, and cost-effective solutions, Program management and support using Planview including Project planning, Budgeting, Status reporting (RAG), Resource planning and Allocation, Identified key areas of improvement in the product design & delivery process and pitched potential solutions for the same to the leadership team. Led the process improvement initiative by streamlining the processes and automating the manual efforts with an improved quality of deliverables, reduced time to delivery and reduced spend per quarter consistently, Built & mentored a high-performance team and pioneered the set-up of center of competence in a short span of time, Configured customized dashboards for effective day-to-day tracking and monitoring

Sr. Technical Program Manager

HTC India Pvt. Ltd. -

Job Description:

Projects Undertaken: SAP Server Migration, O365 Migration (Turkey), Skype Migration, Data & Analytics, Exchange Migration (Hybrid Architecture), Application migration through Rack Space from On Prem to Cloud

Technologies Used: SAP, O365, Skype, Lean methodology, RACI matrix

Achievements and Contributions: Worked as a TPM for Business funded and Client funded projects with several other PM's for a budget of 7M portfolio, Accomplished Exchange Migration (Hybrid Architecture) for MeyDiageo as part of new acquisition successfully, Accomplished bunch of Application migration through Rack Space from On Prem to Cloud; aligned with TCS and Infosys as vendors, Drove process improvement using Lean methodology to solve inefficiencies with employee productivity and the multiple IT applications required for completing job duties, Daily/ Weekly client leadership and stakeholder communication to discuss project direction, overall health, costs, risks, and developing initiatives, Major

contributor to the development of all information technology initiatives for the client, including critical path and design projects, budgeting, planning, policies, and workflow prioritization, Managed Data Analytics projects across geo locations, Allocated resources utilizing RACI matrix and tracked resource utilization in a regular basis, Identified, managed, owned, resolved, and clearly communicated program risks, issues, inter-dependencies and assumptions

Azure Solution Architect

-

Job Description: Technical Consultant

Projects Undertaken:

Technologies Used: Azure, IaaS, PaaS, SaaS, Hybrid cloud, MFA, Azure AD Application Proxy, SharePoint, Azure BLOB storage, NSGs

Achievements and Contributions: Designed Architectures for IaaS VMs, PaaS role instances and SaaS applications appropriate for the workloads (operating systems, applications, databases), transaction volumes, performance goals and security concerns, Designed Azure based Hybrid cloud architecture and migrated applications, Documented low level design, identified protocols and ports to be configured for remote desktop access, Configuring and Managed Multi-factor Authentication (MFA) for Exchange, Implemented Confidential Azure AD Application Proxy for cloud directory in Azure AD, Designed and implemented Single Sign-on for SharePoint using Azure proxy server, Designed and implemented Disaster recovery and backup strategy using Azure BLOB storage, Utilized NSGs for layer 4 Access Control List (ACLs) for incoming and outgoing packets and firewall configuration, Reviewed workloads, system dependencies, business requirements and security requirements to optimize the Azure Subscriptions, V-Net design, NSGs, routing, deployment model and resource groups

DevOps Lead

Icertis Solution Pvt. Ltd. -

Job Description:

Projects Undertaken: Icertis Contract Management System (CLM)

Technologies Used: DevOps, Agile, Scrum, Azure, Azure DevOps (VSTS), CI/CD, Microsoft VISIO, Enterprise Architect, Azure Virtual Machine, Azure App Services, API Management Services, Azure Key Vault Service, Azure Monitor, NSG, ASG, SQL Databases

Achievements and Contributions: Worked as a DevOps Lead for CLM product (Contract Lifecycle Management), Implemented cloud migration and assessment solutions for clients across the globe using Agile-Scrum methodologies, Infrastructure provisioning, Code Build, Application Deployment, Applying security controls for multiple environments, Contributed and involved in HLD and LLD & skeletal code reviews using Microsoft VISIO and Enterprise Architect, Implemented CI/CD pipelines using tools like Azure DevOps (VSTS), Experience with Enterprise Architecture and Product Development in the conception, evaluation, piloting and operational delivery of cloud solutions for the enterprise, Hands-on experience on Azure Resources - Azure Virtual Machine, Azure App Services (Web App, Function App, API App), API Management Services, Azure Key Vault Service, Azure Monitor, Private Endpoints, Application Gateways, Azure Load Balancers, Log Analytics Workspace, NSG, ASG, Virtual Networks, SQL Databases, Azure Storage Accounts, Working knowledge on Azure IAM Concepts (RBAC Models, MFA, Conditional Access, Azure Certificates, Azure Active Directory)

Project Lead

Allscripts India Pvt. Ltd. -

Job Description:

Projects Undertaken: Electronic Healthcare Records (EHR)

Technologies Used: Salesforce

Achievements and Contributions: Worked as a Project Lead for Touch Works EHR (Electronic Healthcare Record) project, Gained an in-depth understanding of EHR product, including technical architecture, by engaging closely with engineering teams to comprehend the platform's technical details and to support the end user practitioners, Assisted Project Managers in streamlining operations and accelerating project progress towards meeting strategic goals, Performed independent research by collecting data, analyzed findings, and set time frames, Reviewed client agreements to identify deliverable, and independently tracked project progress, Worked with technical managers to define and schedule resources required for implementations, upgrades and other projects as needed, Worked on Salesforce tool for tracking the incidents and created resolution document for quick references, Worked with the DBA team for backend data fixes for the application

Software Engineer

Spninx Software Technology Solutions -

Job Description:

Projects Undertaken: Web & Standalone Application development

Technologies Used: Dot Net, JAVA, ASP.Net, C#, SQL Server, SQL

Achievements and Contributions: Worked as a Software Developer on Dot Net and JAVA technology, Hands on experience with ASP.Net, C#, SQL Server; with emphasis on creating web forms, database access, web services and component development, Creation and maintenance of the SQL databases, Maintenance of the applications and modifying the code based on requirements specifications, Experience on SQL, stored procedures, triggers, functions and SQL optimization techniques, Conducted System Analysis, Design, Development and Implementation of various Applications and the subsequent transition to ERP and Web Enabled Application, Performed all the Database related activities such as Database Backup, Restore Operations, troubleshooting issues as and when occurs, Performance Tuning, monitoring error logs, jobs etc., Database Replication, Backup / Restore, script execution and maintenance, Participated in designing, testing and implementing an enterprise Disaster Recovery Plan, Application troubleshooting and co-ordination with various support teams for fixing issues, Record, track, and document the problem-solving process, including all successful and unsuccessful decisions made, and actions taken, through to final resolution.
